

E-levatex-8 exclusive floor lift control system

Operation of the Elevator Telephony system

- The visitor call owner from the Telephony system by entering the 4 digit resident code.
- The resident's telephone or mobile phone (if it is diverted) will ring
- The resident answers the phone and communicates with the visitor.
- To allow access to the lift lobby only, the resident press "0" on phone keypad
- To allow access to the lift lobby and the resident's exclusive floor via elevator, the resident enters the 4 digits security password on the telephone keypad.
- To deny entry, resident just hangs-up the phone.

Optional monitor

- To view visitor at lift lobby, resident activate the wireless monitor in the unit.

Optional Security recording

- DVR recorder installed in main management office records all the visitor using the telephony system and also records the movement around the premises

Note: The E-levatex-8 is currently configured to operate on both Enterphone (Viscount Systems) and Trigon (Trigon Systems) tele-entry systems. Arrangements can be made to modify the system to operate on other tele-entry systems currently used by the end users.
