

## Ebelco standalone intercom system

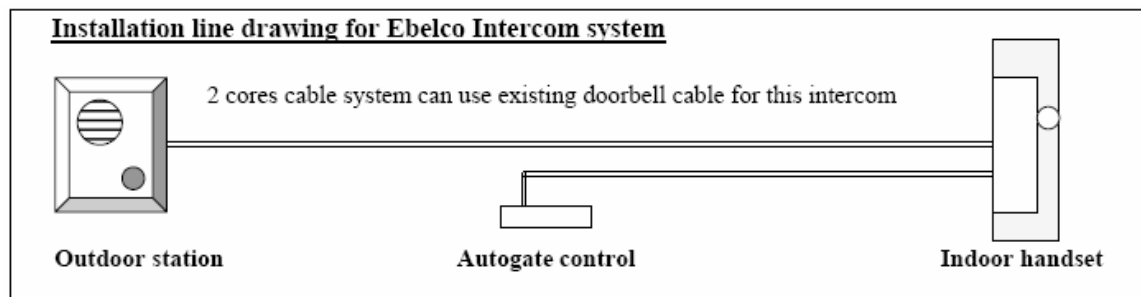

The Ebelco standalone intercom system is a reliable intercom system which can be used both indoor and outdoor purposes. The system is designed to replace aging or malfunction intercom system as it uses the standard 2 wire system to link the door unit to the handset. It uses 4 'AA' to power the whole system, thus simplifying the installation and maintenance of the system.

### The features of the system comprises of:

- 1 unit of weatherproof outdoor intercom unit
- 1 unit of indoor handset which has the following:
  - Built in door bell
  - LED indicator
  - Adjustable chime
  - Volume control
  - Auto door/gate open button

### Operations

The visitor will press the 'door bell' button on the intercom unit to call the handset. On hearing the chime the user will lift the handset to communicate with the visitor. When the identity of the visitor is established, the secured door can be released by pressing the 'door release' button. The handset is placed back to the cradle after ending the conversation.

### Specification:

- Power source : 6 volts DC
- Power supply : 4 'AA' size batteries only
- Power consumption : In use 30mA and chime signal 150mA
- Signal sound : Electronic chime
- Wiring : 2 wires
- Communication range: Up to 300 metres with a 0.65 mm cable diameter.

The system comes with a 1 year warranty against manufacturing defects.
